A postdoc position is available in the Department of Statistics of the National University of Singapore. The position is for two years, after which a contract renewal is possible. Candidates must possess a Ph.D. in computer science, physics, applied mathematics, statistics or a related field.

The topic of the position is flexible. Possible areas of research include: Monte-Carlo methods (MCMC / SMC / particle methods / optimal-transport based approaches), Variational Inference applied Deep-Learning and Inverse Problems, Semi-Supervised and Unsupervised Learning.

If you are interested in the position, please send a short introduction as well as a CV to Alex THIERY <**a.h.thiery@nus.edu.sg**>. You are encouraged to get in touch informally to discuss further details about the position first.

The call will be open until the position is filled.
