## EDUCATION

- 2014: **PhD - Evolutionary biology**, with Honours. Muséum National d'Histoire Naturelle, Paris.
- 2010: **MSc - Ecology, Biodiversity and Evolution**, First class Honours, rank: 5th.  
University Pierre et Marie Curie, Paris VI & Ecole Normale Supérieure, Paris.
- 2007-2011: **Ecole Normale Supérieure**, Paris (entry rank: 4th)

## RESEARCH EXPERIENCES

- 2016- Post-doc : « *Chromosomal inversions and local adaptation in seaweed flies* ».  
Supervised by L. Bernatchez, Université Laval Québec.  
Merit scholarship for foreign students (PBEEE) - FRQNT  
By combining a survey of ecology and population genomics along a latitudinal cline with fitness experiments in the lab and functional test of the genetic basis for adaptation, I am trying to understand how genome structure may favour adaptation to heterogeneous environments.
- 2015: Post-doc: « *Genetic basis of reproductive isolation in Heliconius butterflies* ».  
Supervised by M. Joron (UMR 7205, MNHN). Collaboration with C. Jiggins (Cambridge)  
With RAD-seq on hybrids resulting from experimental crosses, I mapped chemical mating signals and wing morphology in *H. timareta* and *H. melpomene*.
- 2011-2014: PhD: « *Speciation in Heliconius butterflies: the balance between mimicry convergence and ecological divergence* ».  
Supervised by M. Joron (CNRS UMR 7205, MNHN).  
Between co-mimetic sibling species of butterflies, I investigated how mimicry, induced by introgression at colour pattern loci, could affect the nature and the strength of barriers involved in reproductive isolation. The study combines field collection, population genetics, behavioural experiment, experimental crosses, chemical analysis and phenotypic description of shape, pattern and colour.
- 2010: Short project: « *Plant-Pollinators interaction webs in an urban area* ».  
Supervised by I. Dajoz and M. Baude (CNRS UMR 7618, ENS).
- 2010: Master 2 thesis: « *Evolution of plant communities in the Kerguelen Archipelago in the context of biological invasions and climate change* ».  
Supervised by J-L. Chapuis and A. Muratet (CNRS UMR 7204, MNHN).
- 2009: Master 1 thesis: « *Sex change in two species of calyptaeid gastropods: effects of nutrition and perceived mortality rate* »  
Supervised by R. Collin (Smithsonian Tropical Research Institute, Panama).
- 2008: Bachelor thesis: « *Wing-colour variation in Calopteryx and its importance in species recognition and sexual selection* ».  
Supervised by M. Wellenreuther and E. Svensson (University of Lund, Sweden).

## **OTHER PROFESSIONNAL EXPERIENCES**

- Teaching and student supervision:**

2012-2014: Assistant teacher for master's lab courses (MNHN)  
2011-2012: Assistant teacher in animal biology (Université Paris 7)  
2011-2014: Supervision of three undergraduate students involved in short projects (2-3 months)

- Popularising science :**

2012-2014: Adaptation of a citizen science program for high school: Vigie-nature Ecole.  
2006: Naturalist guide in charge of the presentation of a natural area.

## **SKILLS**

**Experimental:** Fieldwork, butterflies rearing, crosses, behavioural experiments.  
DNA extraction, PCR, sequences alignments, population genetics, RAD-seq.  
Extraction and quantification of chemical compounds (GC-MS).  
Geometric morphometry, spectrophotometry.  
Multivariate statistics and analyses with R.

**Languages:** English & Spanish: fluent.

**Naturalistic:** Bird-watching (member of the LPO, Birdlife international).  
Good knowledge of butterflies, odonata and amphibian.

## **EXTRA-CURRICULAR ACTIVITIES**

**2006:** **Driving Licence**

**Hobbies:** Sports, salsa, African dancing, skiing, badminton, climbing.

Photography, naturalist trips, hiking, scuba-diving (level 2).

**Associations:** Secretary / Vice-president in the ENS students association (2007-2010).
