What China told the WHO team in early 2021:

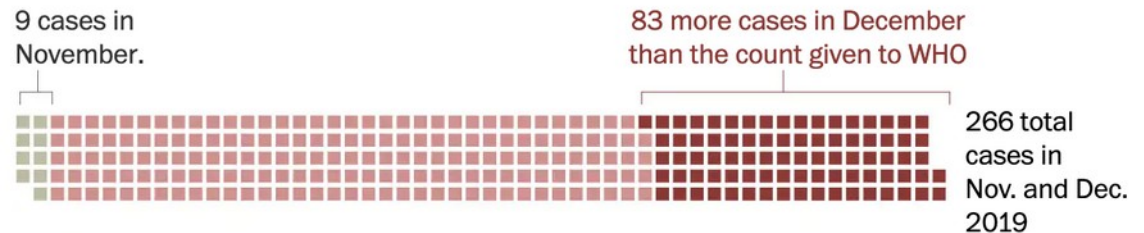

Each square represents one covid case

What three peer-reviewed Chinese scientific papers tell us about cases recorded as of February 2020:

What South China Morning Post reported March 13, 2020, based on leaked Chinese government documents:

Sources: World Health Organization; Cao Wuchun, et al., International Journal of Environmental Research and Public Health, 2020; Yu Chuanhua, et al., Global Health Research and Policy, 2021; Josephine Ma, South China Morning Post, March 13, 2020; An Pan, Li Liu, Chaolong Wang, et al., JAMA, April 10, 2020; Gilles Demaneuf, DRASTIC.

22 November 2022: new batch of emails released to Jimmy Tobias, a freelance writer, after litigation to block the National Institutes of Health (NIH) from making extensive redactions.

Révélation sur la genèse d'un article majeur sur l'origine du SARS-CoV-2

Des e-mails obtenus par des ONG et journalistes américains montrent dans quel contexte a été rédigé début 2020 un article estimant qu'aucun type de scénario impliquant un laboratoire n'était plausible.

Par Hervé Morin https://www.lemonde.fr/sciences/article/2022/12/19/revelations-sur-la-genese-d-un-article-majeur-sur-l-origine-du-sars-cov-2_6155072_1650684.html

23 Nov 2022: Deposition of Dr. Anthony Fauci, as part of Louisiana and Missouri's landmark lawsuit against the federal government and the Biden Administration for colluding with social media companies to censor speech.

Louisiana, Missouri Release Full Fauci Deposition Transcript

BATON ROUGE, LA – Today, Louisiana and Missouri are releasing the full transcript for the deposition of Dr. Anthony Fauci, which was taken on November 23rd, 2022. The deposition was taken as part of Louisiana and Missouri's landmark lawsuit against the federal government and the Biden Administration for colluding with social media companies to censor speech.

Alina Chan

The DisInformation Chronicle

Will the Biden Administration Investigate Evidence of Ghostwriting Involving Francis Collins and Anthony Fauci?

In a 2011 letter, Collins charged that failure to disclose author's involvement is ghostwriting or plagiarism to be handled by the Office of Research Integrity which investigates research misconduct.

SCIENCES • CORONAVIRUS ET PANDÉMIE DE COVID-19

Origine du SARS-CoV-2 : le jeu de piste continue

Les deux principales hypothèses sur l'émergence du virus en Chine restent fortement débattues à ce jour. Entre une source naturelle, provenant des chauves-souris, et la fuite accidentelle d'un virus modifié en laboratoire, les scientifiques poursuivent leur traque.

Les faux mystères de RaTG13, virus cousin du SARS-CoV-2

Début 2020, la description par des chercheurs chinois d'un virus de chauve-souris très proche du SARS-CoV-2 faisait naître des spéculations sur des dissimulations à son sujet, depuis dissipées.

Par Stéphane Foucart

Publié le 19 décembre 2022 à 17h45 •  Lecture 2 min.

https://www.lemonde.fr/sciences/article/2022/12/19/les-faux-mysteres-de-ratg13-virus-cousin-du-sars-cov-2_6155075_1650684.html

Remaining issues with RaTG13 and Zhou et al. Nature paper

- Name change Ra4991 before -> RaTG13 in Nature paper (without mentioning previous name, previous accession number, previously published paper Ge et al. 2016)
- Jie Cui & Yu Ping not authors of the Nature paper, although they sequenced RaTG13
- The tricky sentence about RaTG13:
"We then found that a short region of RNA-dependent RNA polymerase (RdRp) from a bat coronavirus (BatCoV RaTG13)—which was previously detected in Rhinolophus affinis from Yunnan province—showed high sequence identity to 2019-nCoV. We carried out full-length sequencing on this RNA sample (GISAID accession number EPI_ISL_402131)."
- Adding one letter between preprint & published paper:
preprint: *"which **we** previously detected in Rhinolophus affinis from Yunnan Province"*
<https://www.biorxiv.org/content/10.1101/2020.01.22.914952v1.full>
Nature: *"which **was** previously detected in Rhinolophus affinis from Yunnan province"*

Origine du Covid: trois ans après, le mystère demeure

Par **Vincent Bordenave**

Publié le 10/01/2023 à 19:44, mis à jour le 11/01/2023 à 14:03

Today, the signers of this letter (coordinated by the Vandenberg Coalition—a non-partisan organization committed to advancing U.S. national security and emphasizing policy over politics) call on scientific journals and news-gathering organizations worldwide to investigate these failures, hold responsible parties accountable, and rededicate themselves to the founding ideals of their crafts, which should include impartiality and adherence to evidence-based inquiry. Journalists should always prioritize the interests of their readers above any agendas of their sources.

We also call on major news organizations worldwide to carry out deeper investigations into the pandemic's origins, particularly by examining all credible origins hypotheses, and call on scientific journals to examine how the debate about pandemic origins can be more open and balanced.

These are but a few of the notable failures:

Now in charge, House Republicans launch flurry of investigations

New probes will examine origins of COVID-19 pandemic and research ties to China

13 JAN 2023 • 3:40 PM • BY SCIENCE NEWS STAFF

Representative James Comer (R–KY), chair of the House oversight panel that will administer the select committee, has said it will investigate “what the U.S. government knew regarding the origins of COVID-19 and when the government knew it.”

EcoHealth Alliance 
@EcoHealthNYC

EcoHealth has cooperated with every bipartisan initiative that has contacted us and will assist lawmakers in their efforts to understand the scientific evidence behind COVID-19's origins.
